More opportunities
for your business

An efficient computer network is the basis of the stable operation and development of any business. Even the smallest failure or data leak may generate huge costs and risk damage to the company image, and this could be avoided. See how much you can benefit from using the Axence nVision® 10 software.

Additional benefits:

- ✓ Perpetual license for which you pay only once
- ✓ No need to buy additional components
- ✓ Easy, fast and cheap implementation which does not require the integrator's support.

Meet the GDPR requirements

Ensure even greater security for your company thanks to Axence nVision® 10 which has been designed with great care in terms of security, particularly with regard to gathering personal data. The penalties that might be imposed for the violation of the regulation reach up to EUR 20 million or 4% of the annual turnover of the company.

Keep your business data safe and secure

Reduce the risk of data leakage and secure your network against viruses installed automatically from pendrives. According to the report 39% of the 800 asked managers said that they would have connected the found pendrive to their computer at work.

Source: Palo Alto Networks

Reduce your yearly budget for licenses and support by 20%

Every fifth purchased license is not utilized. One network may have even a few thousand redundant applications.

How much can you save?

Bottling plant X: USD 5 million.

Educational company Y: USD 4.5 million.

Rise up the effectiveness of your employees

The awareness of employees about the control of their actions influences the efficiency of their work. Did you know that employees spend 1 hour and 11 minutes per day on websites unrelated to their duties? At such times they are more exposed to attack

Save up to a few million per year on downtime

Implementation of IT management software allows the reduction of infrastructural failures by 65%.

Source: IDC

Improve the work of your IT department

Thanks to the functions facilitating the work of the network administrator (such as handling incidents at the Helpdesk, remote desktop, view of critical devices), it is possible to deal with the notices and respond to dangerous incidents more quickly. 32% of all IT incidents is related to the human factor, where 6% refers to configuration errors, and 26% refers to other employees errors.
